Understanding CRREM: Pathways, Methodology & Emerging Developments (Webinar)

The Carbon Risk Real Estate Monitor (CRREM) provides a framework for assessing the alignment of real estate assets with decarbonisation pathways. CRREM is already referenced in GRESB assessments, and its methodologies are increasingly relevant to how real estate portfolios assess and manage transition risks.

Join us for a webinar with Benjamin Towell, Executive Director, Sustainability Office, Global Wholesale Banking, OCBC, and a member of the CRREM Technical Council. Ben will provide an overview of the CRREM methodology, its underlying approach, ongoing developments and potential application to Singapore real estate assets.

The presentation will be followed by an interactive Q&A session.

Date: **19 November 2026 (Thu)**

Time: **4pm – 5.15pm**

Format: **Via Zoom**

Fee: **For REITAS members only and complimentary**

OCBC REITAS

Registration

Please email completed registration form to secretariat@reitas.sg by 16 November 2026.

Registration form can be found here.

Speaker

Ar. Benjamin Towell

Executive Director, Sustainability Office, Global Wholesale Banking, OCBC

Benjamin is the Executive Director of the Global Wholesale Banking Sustainability Office, where he leads the team driving the sustainable built environment agenda and the transition of SMEs.

Recognised for his candid approach and deep technical expertise, Benjamin plays a pivotal role in advancing the transition efforts of OCBC's global clientele.

Benjamin is part of CRREM's Technical Council, the governing body responsible for the independent development, maintenance, and approval of CRREM pathways. Beyond this, he is actively engaged by Green Building Councils, professional bodies, and standard setters in the built environment space.
